

4.5.6

Release Notes

Overview

About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Best practices to help you maximize the benefits

Beyond the major new features, the Additional Enhancements section include a list and brief description of every other enhancement or functional change included in the latest release—everything from email, to new report types, to security and packaging.

Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continuously improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting support@mambu.com.

[1.2 “Inconsistent Schedule” exception thrown when entering a repayment on an old V4.4 account having “Recalculate Schedule, Keep the Same Total Repayment Amount” recalculation method](#)

1. Bug Fixes

1.1 “Negative principal” error returned when posting a prepayment on a loan account with Recalculate schedule, keep the same total repayment amount

“Negative principal” error was returned when posting an Interest Applied transaction on loan accounts with “Recalculate the schedule, keep the same total repayment amount” prepayment recalculation method. The issue was caused by applying the interest on smaller time intervals leading to a higher interest amount than the Payment Due amount.

Mambu fixed this problem and transactions can now be made on the affected accounts.

1.2 “Inconsistent Schedule” exception thrown when entering a repayment on an old V4.4 account having “Recalculate Schedule, Keep the Same Total Repayment Amount” recalculation method

An error was thrown when making a repayment on specific loan accounts with “Recalculate the schedule, keep the same total repayment amount” prepayment recalculation method and manually applied interest transactions between installments due dates. This bug was a consequence of the above mentioned behaviour (see issue 1.1).

Mambu fixed this problem and users are now able to post transactions on the affected accounts.
